

AGORA electroacoustic sound theatre

Natasha Barrett 2000-2003

Music: Natasha Barrett

Text: Sound Poetry created from selected Old Norse, Old English, Norwegian and English extracts. Compiled by Natasha Barrett

Installation design: Natasha Barrett, Birger Sevaldson, Ocean North, Øyvind Hammer

Technical design: Natasha Barrett

Addition programming and electronics:
Øyvind Hammer

Preliminary pilot project commissioned by BEK with funds from the Norsk Kulturråd.

Installation design and construction funded by the Fond for Lyd, Bilde and the Norsk Kulturråd and Mésen.

AGORA: a one hour electroacoustic work involving live soprano, sound-making installation and dynamically spatialised electroacoustic sound.

"Agora" in classical Greece: a political, economic and social meeting place. The AGORA-project, a meeting place on three levels: a theatrical study of simultaneous psychological states; an electroacoustic score; a convergence in time and place of three elements - theatre, installation and electroacoustic sound- originally presented independently. Despite the immense differences between each of these elements, they are united in the AGORA premises.

The technology: cohesion through a common computer model

A computer "collision avoidance algorithm" was designed and the time developing process and pattern visualised. In this model, virtual "agents" or virtual people are each given goals and personalities that determine how they can move through the virtual space filled with obstacles. The resulting time-developing trace was used as a template for second-order ambisonics sound spatialisation, sound transformation and for physical installation design. The virtual model therefore became a real manifestation in the performance space.

The installation and electromechanics

The installation is constructed from aluminium, fabric and plastic membranes. The elements are modular and allow for adjustments to suit each space.

Two types of computer controlled acoustic sound sources are integrated into the electroacoustic composition and the installation:

- (a) Small electronic actuators receive voltage inputs from audio amplifiers. These devices input sound making vibrations into eight membranes that serve to amplify and colour the audio input.
- (b) Computer controlled electromagnets are used to hit long aluminium bars (3 to 6 meters long) suspended above the audience. The audio result is a series of strongly resonant bar-chimes.

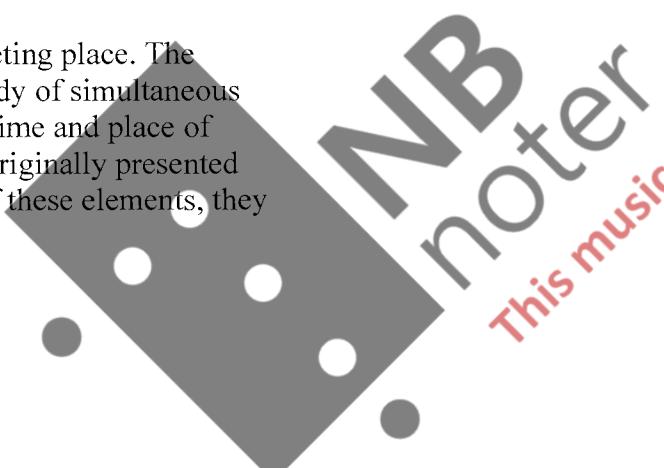

The electroacoustic music

The electroacoustic work is projected over 11 to 14 loudspeakers. Over a central hexagon of loudspeakers sound spatialisation is pre-encoded / pre-composed with ambisonics technology. Over the remaining loudspeakers, traditional sound diffusion from a stereo source is performed in the space. A computer plays the electroacoustic material, controls the electromechanics, distributes the soprano's amplified voice and provides the soprano with a synchronised guide-track.

For images, technical descriptions and detail on the three AGORA elements:

<http://folk.uio.no/natashab>

<http://www.notam02.no/~natashab>

AGORA – performance instructions

Technical requirements:

1. G4 Macintosh computer
2. MAX/MSP patch and audio materials (contact composer).
3. 2 GB hard disk space
4. 16-channel sound card
5. MIDI interface
6. At least 10 loudspeakers (6 matching)
7. Radio microphone and headphone

The performance score contains the soprano vocal line and information on timing and synchronisation in relation to the tape part. If the directions are followed, the parts should easily fit together.

The soprano is provided with a headphone guide track containing tempo, rhythmic, pitch information and cue points as necessary. All information is sent from the main computer.

For computer materials and further technical information contact: natashab@notam02.no

The foundation

An electroacoustic work where spatial information is the structural driving force.

A physical construction emphasises the sonic space and guides the solo performer.

Acoustic resonating objects articulate the spatial electroacoustic score and sonically unite human and computer sound.

To consider sound production, spatial delineation and theatre as interdependent elements.

The music and the drama

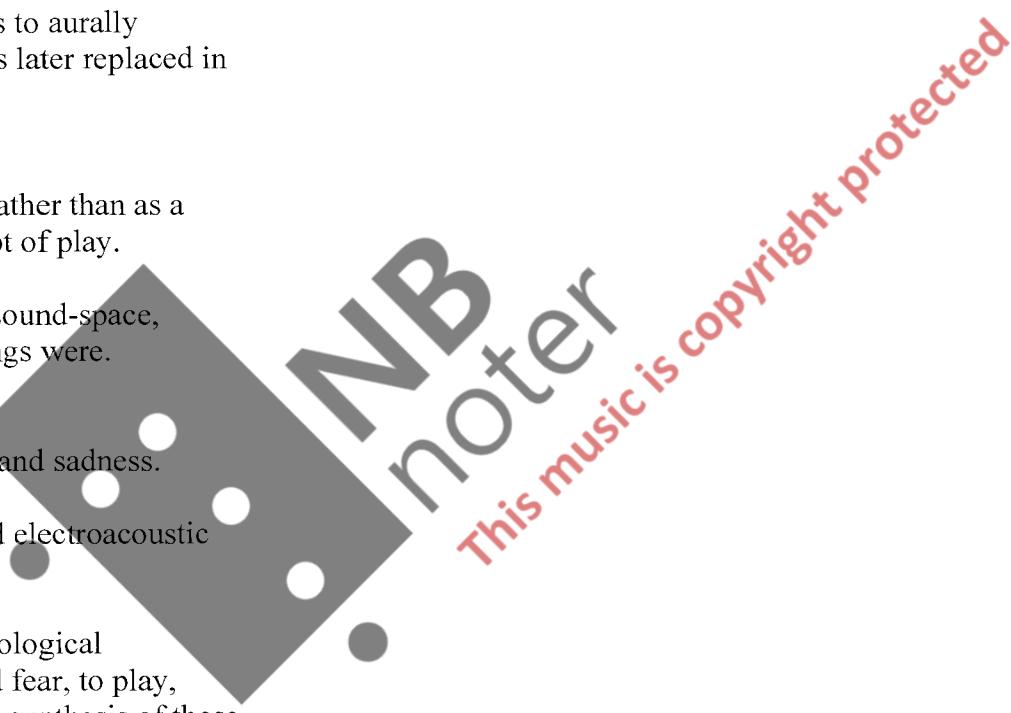

Different psychological and physical conditions are developed, each of which embody a different spatial character in electroacoustic sound activity and physical presence of the performer:

- Forced: fettered, trying to break free but continuously blocked.
- Fear: surrounded by evil. In this state the performer attempts to aurally 'confide' the fears with parts of the installation. This sound is later replaced in the space through use of electromechanics.
- Play: delight and mischief. Playing like a strange creature rather than as a child. Simultaneously describing and embodying the concept of play.
- Socially restrained and refined: a calm interaction with the sound-space, telling an unknown story and explaining how unknown things were.
- Longing: a direct expression of longing containing anguish and sadness.
- Anger: a direct expression of rage integrating performer and electroacoustic sound-theatre.

In AGORA the spatial sound-world is the driving force for a psychological progression meeting outer and inner resistance: from confusion and fear, to play, explanations and understanding, to longing and anger, and finally a synthesis of these elements. The soprano articulates the vocal and spatial 'tip of the ice-berg'. The electroacoustic part expresses a multiplicity within which the soprano is a singularity.

Text

Fragments of text from Norwegian (Ibsen, Obstfelder, Wergeland); English (Poe, Lewis Carroll, Wordsworth); Old English (extracts from the Exeter Book and other Old English texts from the 9th Century); and Old Norse (extracts from the Gamle Edda) are the only libretto elements. These fragments have been selected in their sparsity to embody the six character conditions and to emphasise the timelessness of AGORA through a composed sound poetry.

Text extracts used in AGORA and their contexts:

ENGLISH

Extract: The fetters of a dream, opposed to love.

Context: WORDSWORTH - LAODAMIA

That self might be annulled: her bondage prove
The fetters of a dream, opposed to love."----

Extract: And evil Spirits 'may' our walk attend

Context: WORDSWORTH - ECCLESIASTICAL SONNETS, 1821-22.

XVIII. APOLOGY

NOR scorn the aid which Fancy oft doth lend
The Soul's eternal interests to promote:
Death, darkness, danger, are our natural lot;
And evil Spirits 'may' our walk attend
For aught the wisest know or comprehend;
Then be 'good' Spirits free to breathe a note
Of elevation; let their odours float

Extract: 'Twas brillig, and the slithy toves
Did gyre and gimble in the wabe

Context: Lewis Carol, Alice in Wonderland

Extract: And what is to gyre and gimble?
To gyre is to go round and round like a gyroscope.

Context: Lewis Carol

Extract: On desperate seas long wont to roam,
Thy hyacinth hair, thy classic face,

Context: EDGAR ALLAN POE (1809-1849) - TO HELEN

On desperate seas long wont to roam,
Thy hyacinth hair, thy classic face,
Thy Naiad airs have brought me home

To the glory that was Greece,
And the grandeur that was Rome.

Extract: Get thee back into the tempest and the Night's Plutonian shore

Context: EDGAR ALLAN POE (1809-1849) - THE RAVEN

"Be that word our sign of parting, bird or fiend!" I shrieked, upstarting--
"Get thee back into the tempest and the Night's Plutonian shore!
Leave no black plume as a token of that lie thy soul hath spoken!
Leave my loneliness unbroken!--quit the bust above my door!
Take thy beak from out my heart, and take thy form from off my door!"
Quoth the Raven "Nevermore."

NORWEGIAN

Extract: Tusende Gange har du kuget og tvunget os.

Context: IBSEN- PEER GYNT

Vi er Sange;
du skulde sunget os!
Tusende Gange
har du kuget og tvunget os.
I din Hjertegrube
har vi ligget og ventet;
vi blev aldrig hentet.
Gift i din Strubel!

Extract: Tro ei, hvert et Skratt er Latter.
Satan kun og Sorgen skratter.

Context: HENRIK WERGELAND - SORGENS SKRATT
Tro ei, hvert et Skratt er Latter.
Satan kun og Sorgen skratter.
Englen smiler, Glæden leer.
Ak, men Latterklangen er
Glædens Flugt paa lette Fjer
ifra Adamshjertet atter.
Fly, Secund! og Himlens Datter
flaggrer ei om Læben meer.

Extract: Hei! Se mine hvide arme! Mit hår flyver, hei! Leg med mit hår, orkan!

Context: Sigbjørn Obstfelder - ORKAN

Blæst, storm, orkan!

Nøgen vil jeg bade mig i din susen!

Hei! Se mine hvide arme!

Mit hår flyver, hei!

Leg med mit hår, orkan!

Extract: Lidt efter hvert kom også vi to til at samtale for os selv, vi gled bort fra de andre ved samme bord.

Context: Sigbjørn Obstfelder: KORSET. EN KJÆRLIGHEDSHISTORIE

Extract: Hans Længselsuk forfulgte den Sky,
som fløi mod Vestenegnen.

Context: HENRIK WERGELAND - SAMLEDE SKRIFTER, 1833-1841

1DEN FANGNE BONDE PAA AGERSHUUS

Der sad en Fange fra Mornens Gry

til Aftenrødens Blegnen.

Hans Længselsuk forfulgte den Sky,
som fløi mod Vestenegnen.

Extract: Når tordenen ruller,
og stormene brøler om hevn, om had,

Context: Sigbjørn Obstfelder: Skovviser, nr. 2

Når tordenen ruller,
og stormene brøler om hevn, om had,
når mørket sniger sig rundt vor hytte,
da må du være hos mig.

When the thunder rolls,
and the storms roar for revenge, about hatred,
when the darkness sneaks around our cabin,
then you must be with me.

OLD NORSE

A handwritten musical score page 64, continuing from the previous page. The score is for two voices (Soprano and Alto) and includes piano accompaniment. The vocal parts are in common time, with a key signature of one sharp. The piano part is in 6/8 time. The vocal parts begin with "for os selv" and "to roam". The piano part features a prominent bass line with sustained notes and eighth-note patterns. The vocal parts continue with lyrics: "som HAD fløi", "hyacinth hair", "mod", "BACK face", and "vestene". The piano part concludes with a dynamic instruction "sfz". A red diagonal watermark "This music is copyright protected" is visible across the page. A large, semi-transparent watermark "NIB Noter" is also present.
