

Koral (2021)

For flute, tenor saxophone, percussion and double bass

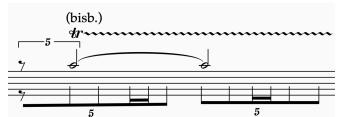

Anders Krøger

Full Score

Flute:

Rhythmized bisbigliando, stems marks the rythm.

Harmonic bisbigliando; Same harmonic with two different fingerings

Breath Tone:

- Full circle - ordinario,
- Half circle - 50/50 tone and air
- Hollow circle - only air

Multiphonics:

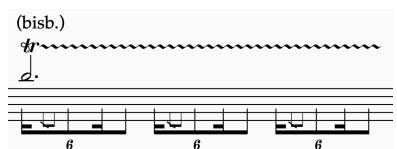

The multiphonics are found in “For the contemporary flutist” by Wil Offermans, Etude no. 5.
A video could be found on youtube.

Tenor Saxophone:

Multiphonics:

Both multiphonics are found in this book:
Weiss, Marcus & Netti, Giorgio (2010). The Techniques of Saxophone Playing
The audio representation could be found on this website
https://www.baerenreiter.com/materialien/weiss_netti/saxophon/

Rhythmized bisbigliando, stems marks the rythm.

Percussion:

Instrumentation:

- 2 Finger cymbals (*Preferably “dirty”-sounding and in different frequency areas*)
 - 3 Small bells (*Preferably in different frequency areas*)
 - 2 Oriental cymbals (*any type of “non-western”/oriental cymbal with a long decay, in different frequency areas*)
 - 2 Wind Gongs (*Preferably in different frequency areas*)
- Vibraphone

General:

All percussion instruments should always be allowed to ring with its natural decay, with no muting of the sound. (Laissez Vibrer)

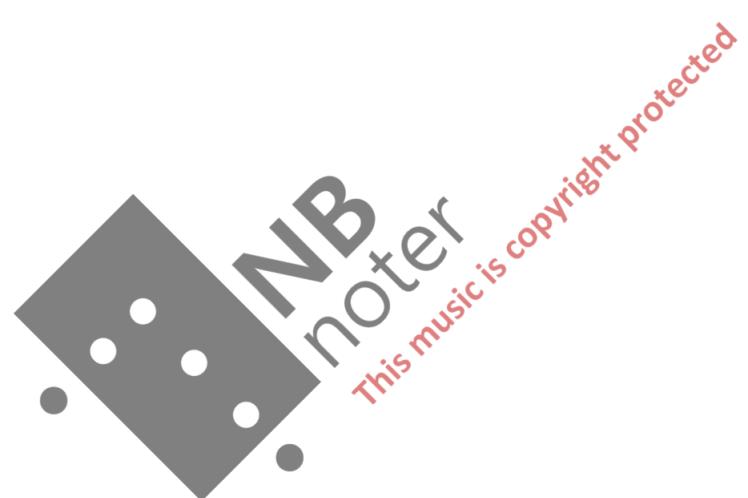

The musicians should be holding one vibraphone mallet and one glockenspiel mallet in each hand. Always use the mallet that creates the biggest sound quality, if possible. The few exceptions are marked in the score.

At one point (between mm. 41-61) the percussion instruments are to be played with a cymbal. The cymbal is placed on the finger to allow it to vibrate. Then the cymbal is struck with a mallet and placed onto the different percussion instruments. The stems indicate strucking of the cymbal.

The vibraphone should always be played with pedal (except between mm. 67-89)

Double Bass:

Sounds one octave lower than notated in all clefs.
