INSTRUCTIONS

For the flute

(\otimes) = Breath, without sound (not to plan the lip, don't let the breath go out to the angles of the mouth)

= Key struck (marks the position of resonance, not the height of the mechanical noise)

= bands of natural harmonics

= covering the mouthpiece entirely with the lips, hold it between the teeth (without chlenching them) as far inside the mouth as possible with the tongue in the hole of the mouthpiece (close it more than 2/3 of the way, leaning on lower part). Almost without any pressure, one can produce a light hiss pitched two octaves above the fundamental.

= covering the mouthpiece entirely with the lips, hold it between the teeth (without chlenching them) as far inside the mouth as possible, blow a violent glissando as if warming up the instrument. It will sound a major seventh lower.

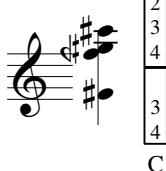

= always while covering the mouthpiece, make a rounded, resonant tongue stroke. It will sound a major seventh below.

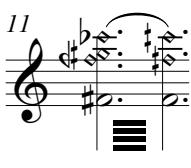

= natural harmonics on the fundamental.

9

= multifonic artificial sound, with secure emission and control

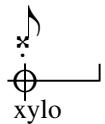

= multifonic tremolo

For the harp

= stop the lowest tone in the chord

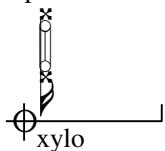

= damp the strings near by the neck with one hand and play with the other.
The preferred sound should be like a playing a xylorimba.

percossa

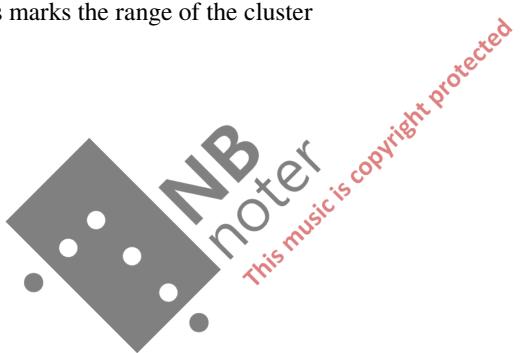

= in treble system:
damp the strings near by the soundboard with right hand and struck the strings with the left
= in bass system:
damp the strings upper part with the left hand and struck the strings with the right

p
percossa

= damp the strings upper part with left underarm and struck the strings with the right.
The "noteheads marks the range of the cluster

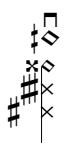

For the viola

martellare percossa

= harmonics or quasi harmonics, give the string just a soft touch with the left hand finger in the indicated position. Real harmonics will sound, quasi harmonics will "whisper"

= quasi harmonics chord, press the strings just with a soft touch, play the two darkest strings a short while, then change to the next two

(b) tr~~~~~

= (b)(b)(#)(x)(#x) indicates the position of the trill note (flat, natural, sharp, double sharp or triple sharp), the intervals must be one, two, three four or five semitones

Aurora Borealis

for flute, harp and viola

$\text{♩} = 60 \text{ ca}$

The musical score continues from measure 14. The flute and bassoon parts are silent. The violin part begins with a dynamic 'ff' followed by a sustained note with a fermata. The bassoon part resumes with a sixteenth-note pattern. The xylophone part enters with a rhythmic pattern consisting of eighth-note triplets. The violin part concludes with a sustained note.
